Chana Forehand and Tracy Forehand are first-class educators at SO.CAP. USA Hair Extensions, an international hair company. Today, they will be showing us how to transform a client's neutral hair into a sophisticated and exotic hairstyle.

# GLAMOUR FOR THE HOLIDAYS WITH HAIR

**Step 1:** First, you have to evaluate the model's facial features, as well as her needs and wishes. Also, it is important to take into account the outfit to be worn and the chosen color of make up, to be able to create a successful color combination.

**Step 2:** Comb and straighten the client's hair.

**Step3:** We've chosen a hair extension method that bonds with keratin and softens when using the applicator unit. A "brick" pattern arrangement is favored for those clients who have fine and thinning hair. On the other hand, for those clients with coarse or full hair, frequent intervals are a better option.

**Step 4:** Make sure the client is properly prepped by using SO.CAP.USA Steps 1, 2 and 3. Then separate the hair starting close to the head's occipital growth area to begin applying the extensions.

# EXTENSIONS

**Step 5:** Separate a section of hair, which should be approximately similar in size and have the same amount of hair as the extension itself. Place the extensions at 0.25 - .50 inches from the hair's root and from the scalp.

**Step 6:** Apply heat on the extension using a SO.CAP.USA applicator unit.

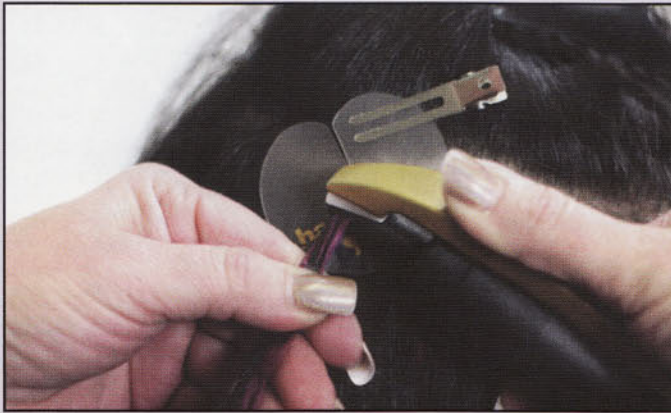

**Step 7:** When that should be reinforces the the extension i

**Step 10:** Work

**Step 11:** Clean, straight parts and uniformly bonded extensions are critical to natural looking hair extensions.

heated, the keratin protein expands to the sides, creating two "wings" folded one on top of the other, and re heated again. This procedure keratin fastening process, smoothes, and eliminates the "bump" so that is not noticeable to the touch or to the sight.

ply heat using the applicator unit. Heating the bond a second time moisture has been removed and creates a complete seal between the client's hair.

**Step 9:** And fold the protein's excess or "wings" using your fingers.

the remainder of the hair in the same manner.

# hair extensions

**Step 12:** Once all the extensions are in place, detail the ends and work on the lengths to achieve a natural effect with nice movement.

**RESULT:** A sensual, feminine and fun hairstyle enhances the model's features.

**STYLE:** To highlight the extensions' glamour to the maximum, the expert Chana creates a gala hairdo through the application of temporary extensions.

Tease the hair of the crown with a comb. Fasten these strands with a strong holding hair spray. Comb the strands backwards, and fasten them in a chignon. Take the hairs at the sides, together with the extensions, to the back of the head. Set the hairstyle with a pin. Work the strands of the back union with a curling iron and a hot iron.

**STYLE VARIATION:** A luxurious and multi dimensional style: a shiny top, a colorful crown of flowers at the back, and an exceptionally shiny and healthy coif are the results of this beautiful job.
